   a. Enabling TradeTool
   b. Input Fields
   c. Usage

I. Release Notes:

v.2.0
- Added provisions for pending orders

v.1.1
- Fixed a visibility issue

v.1.0
- Initial Release

II. USER GUIDE

TradeTool is a basic order management solution, and an extension of MetaTrader's One Click Trading feature, that allows Stop Loss and Take Profit levels to be automatically placed based on set POINTS distance.

II.a. ENABLING TRADETOOL

Make sure *AutoTrading* is enabled and *Allow live trading* is checked. Tradetool will not work if both are disabled.
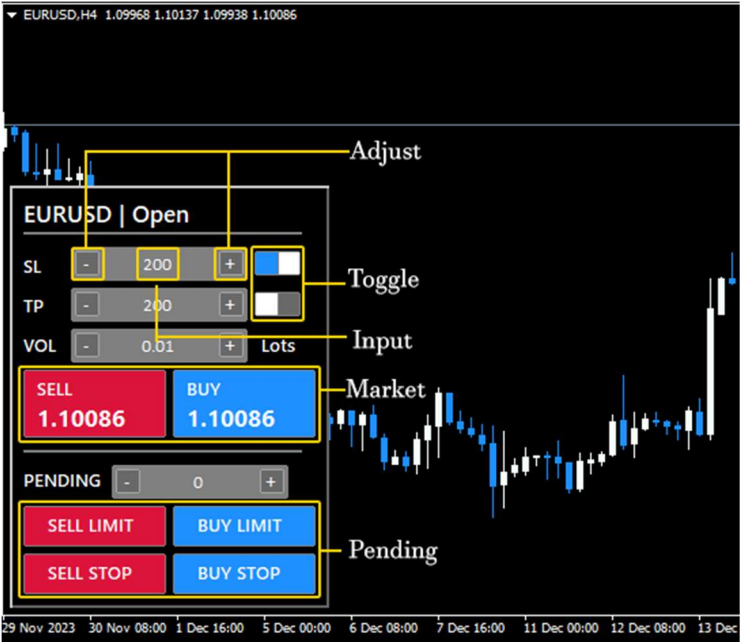

II.b. INPUTS

1. Magic Number – Expert Magic Number
2. Volume – Default Volume
3. Default SL – Stop Loss default points distance from current market price
4. Default TP – Take Profit default points distance from current market price
5. Step – Adjustment step size in points

II.c. USAGE

Adjustment Buttons – Adjusts SL and TP points based on input step size

Toggle – Enables/Disables placing SL and TP

Input – Input field for SL and TP points

Market – Market Buy/Market Sell

Pending – Pending Order (Limit / Stop)
